3 THINGS YOU NEED FROM A GLOBAL VENDOR TO PREVENT BIOMETRIC IDENTITY FRAUD

- Login
- Open an account
- Confirm transaction
- Pay by Face

Oz Forensics is a global leader in preventing biometric and deepfake fraud.

We are a 100% private and independent developer of antifraud biometric software with high expertise in the fintech market.

Our flagship products, **Oz Liveness** and **Oz Biometry**, play a critical role in helping organizations of various sizes and industries defeat biometric attacks and securely onboard customers.

Our tools are crucial in supporting global enterprises and governments to mitigate biometric fraud, meet compliance mandates and deliver outstanding service.

SECURITY AND TRUST

Oz Liveness technology is certified in ISO-30137-3 standard by level 1-2 at NIST accredited iBeta biometric test laboratory. It has **100%** accuracy and prevents biometric and deepfake attacks.

Oz Biometry technology has **99.99%** accuracy in NIST FRVT. Developed by Oz Forensics specialists, the biometric module incorporates the latest practices in artificial intelligence and is consistently improved by continuous data enrichment.

$15M
we saved for our clients in last year

20 MILLION
biometric checks per month

FLEXIBILITY

Liveness and Biometry **Mobile\WEB SDK** for action control and video recording.

Server API: easy integration of biometry and liveness checks with any system via the REST interface.

On-device Liveness and Biometry allow on-device analyses used to take a photo or video. No server is required. No data transferring.

Active Liveness invites the user to do some action (approach, wink, smile, turn the head).

Passive Liveness: no need for any active action. Just look at the camera.

SaaS and Onprem: gain flexibility and save time with SaaS and on-premise 1-day deployment.

Customization of Interface: your unique style is outside, and our powerful Liveness engine is inside.

Quick turnaround: we are an independent client and partner oriented vendor. We respond quickly, and your goals are our high priority.

50%
reduction in time and budget for the registration process

1 SECOND
time of liveness check

client conversion

EASE OF USE

Ready-to-use demo stand / Developer's sandbox: a tech spot for testing and pilot projects available 24/7. The access credentials are provided by request.

Fast implementation: at least 1-day deployment based on your infrastructure.

Easy integration using Docker. The intuitive verification process is suitable for even non-tech users.

Ready to help technical support: get consultations and support from our experts. Free of charge piloting.
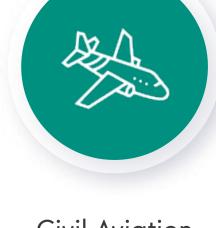

50%
total project cost saving

UP TO 61%
third-party attacks rate increased from 44% in the last several years*

Oz Forensics opens and verifies accounts for

- Digital banking
- Telecom providers
- Microfinance
- Civil Aviation
- Fintech
- Public healthcare and insurance
- Time and Attendance
- Government
